

INFORMATION AS INFRASTRUCTURE

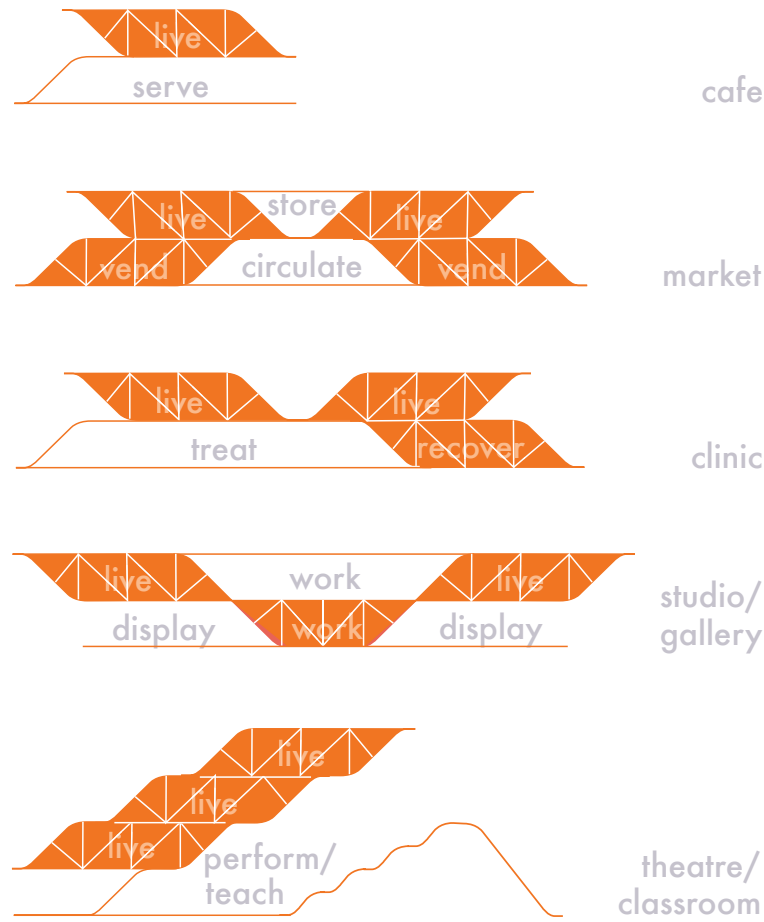

adaptability

The modular corrugated units allow diverse forms for a dynamic program that adjusts to the user. The smart phone encourages the free exchange of design ideas.

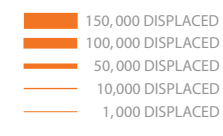

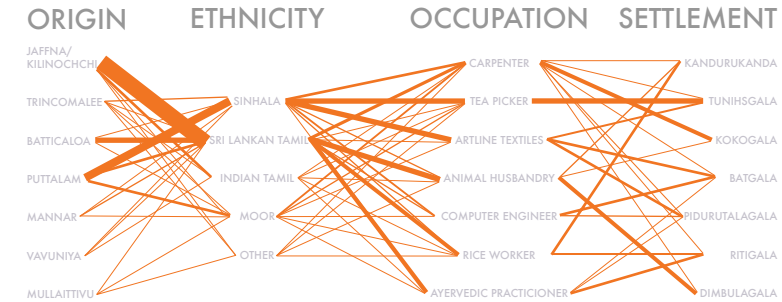

scalability

Scale and program is not restricted to the available materials in a single personal infrastructure unit. The smart phone allows collaboration with other units to build larger, spacially complex forms.

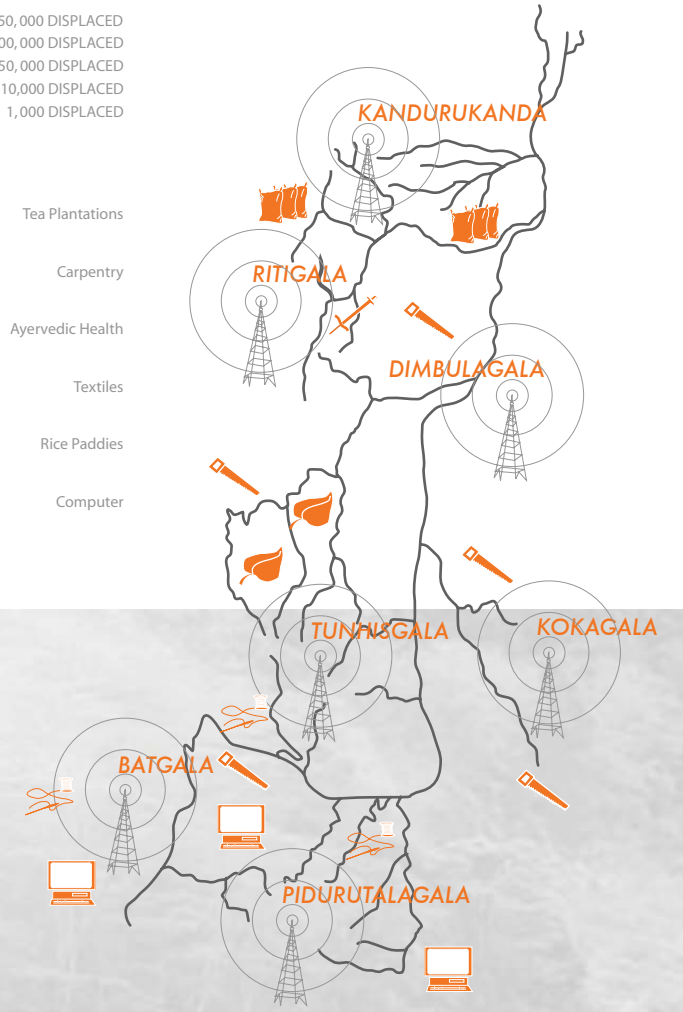

community networks

profiling creates dynamic cultures and economies. occupation-based communities. constantly changing forms, adapting to noma...

permenance/ impermanence

During times of violence, all interconnected IDPs share information and alert others in the area of the dangerous environment. The warning system buys IDPs time to collapse their infrastructure, pack their possessions and relocate. Being a part of the greater network allows them to establish a new home without depending on the resources of a hazerdous area.
